

Google Apps

Disconnect a site or app that I have authorized access to?

Our users can allow sites and apps to access to their school provided Google accounts. Sometimes you may wish to remove these rights after you no longer want to use a specific site or app.

1. Go to the "[My Account](#)" page. If you are not already logged in, you will need to log in using your PA Virtual provide credentials.
2. In the "Sign-in & security" area, click on the link for "Connected apps & sites" and then "Mange Apps". (Or you can go directly to the [Apps connected to your account page](#) with this link.)
3. Here you can review the various apps and sites you have granted access to your Google account. 
4. If you click on one, you can get additional details, as well as blue "Remove" button that you can use to disconnect the app/site. 

For additional details, please review the Google support site section on [Apps connected to your account](#).

Unique solution ID: #1058
