How Do I Install The Printer?

The PA Virtual provided computer has all the software necessary pre-installed for you. This includes the print drivers, and printer software for the PA Virtual provided printers. You do NOT have to follow the standard directions provided with your printer. You only need to plug the printer into the USB port of your computer.

If you are trying to use a printer not provided by PA Virtual, or you are having some trouble with your printer, please contact the PA Virtual Technology Support Helpline. Please see "[What Is The Tech Support Helpline Number?](#)"
