How Do I Clear Internet Explorer Cache?

For best results, we suggest you use the "Clear Cache" icon on your desktop. (See the "[How Do I Clear My Cache?](#)" page for details).

If you do not have the "Clear Cache" icon, or if you need to just clear the Internet Explorer's cache or delete other browser history from Internet Explorer, you will first need to open the "Delete Browsing History" window.

1. Click on the "Tools" menu

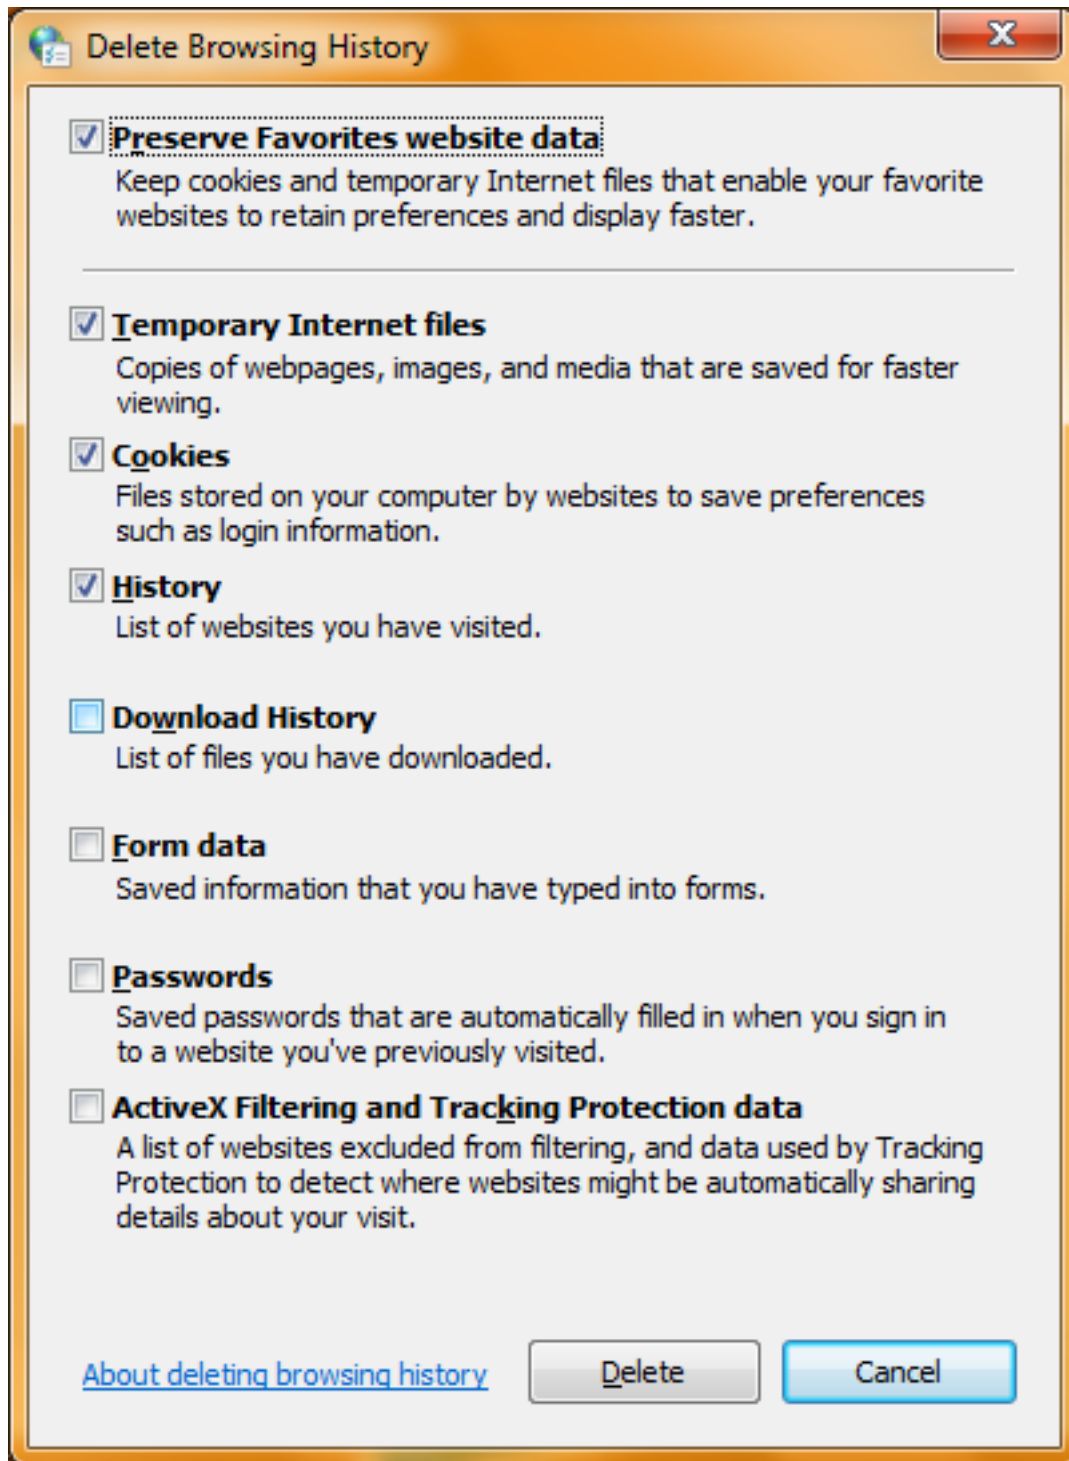

2. Choose "Safety" and then "Delete browser history..."

From the "Delete Browsing History" window, you can pick and choose what things you wish to delete. If you wish to just clear the cache, only check "Temporary Internet files". Then click the "Delete" button.

Internet

For additional information, you can view Microsoft's "[View and delete your browsing history](#)" page.
